Introduction

At 2Xideas, we implement our active ownership strategy by executing proxy votes via ISS – Institutional Shareholder Service. We rely on the ISS Sustainability Benchmark Voting Guidelines and Research among other resources to complement our fundamental research on the governance structures of investee companies. The ISS Sustainability Voting Guidelines align with our investment philosophy and provide the basis for our decision-making process.

ISS recognizes the growing view among investment professionals that sustainability or environmental, social, and corporate governance (ESG) factors could present material risks to portfolio investments. Whereas investment managers have traditionally analyzed topics such as board accountability and executive compensation to mitigate risk, greater numbers are incorporating ESG performance into their investment making decisions in order to have a more comprehensive understanding of the overall risk profile of the companies in which they invest to ensure sustainable long-term profitability for their beneficiaries.

Investors concerned with portfolio value preservation and enhancement through the incorporation of sustainability factors can also carry out this active ownership approach through their proxy voting activity. In voting their shares, sustainability-minded investors are concerned not only with economic returns to shareholders and good corporate governance, but also with ensuring corporate activities and practices are aligned with the broader objectives of society. These investors seek standardized reporting on ESG issues, request information regarding an issuer's adoption of, or adherence to, relevant norms, standards, codes of conduct or universally recognized international initiatives including affirmative support for related shareholder resolutions advocating enhanced disclosure and transparency.

ISS has, therefore, developed proxy voting guidelines that are consistent with the objectives of sustainability-minded investors and fiduciaries. On matters of ESG import, ISS' Sustainability Policy seeks to promote support for recognized global governing bodies promoting sustainable business practices advocating for stewardship of environment, fair labor practices, non-discrimination, and the protection of human rights. Generally, ISS' Sustainability Policy will take as its frame of reference internationally recognized sustainability-related initiatives such as the United Nations Environment Programme Finance Initiative (UNEP FI), United Nations Principles for Responsible Investment (UNPRI), United Nations Global Compact, Global Reporting Initiative (GRI), Carbon Principles, International Labour Organization Conventions (ILO), CERES Roadmap for Sustainability, Global Sullivan Principles, MacBride Principles, and environmental and social European Union Directives. Each of these efforts promotes a fair, unified and productive reporting and compliance environment that advances positive corporate ESG actions that promote practices that present new opportunities or that mitigate related financial and reputational risks.

On matters of corporate governance, executive compensation, and corporate structure, the Sustainability Policy guidelines are based on a commitment to create and preserve economic value and to advance principles of good corporate governance.

These guidelines provide an overview of how ISS approaches proxy voting issues for subscribers of the Sustainability Policy. We note there may be cases in which the final vote recommendation at a particular company varies from the voting guidelines due to the fact that we closely examine the merits of each proposal and consider relevant information and company-specific circumstances in arriving at our decisions. To that end, ISS engages with both interested shareholders as well as issuers to gain further insight into contentious issues facing the company. Where ISS acts as voting agent for clients, it follows each client's voting policy, which may differ in some cases from the policies outlined in this document. ISS updates its guidelines on an annual basis to take into account emerging issues and trends on environmental, social and corporate governance topics, as well as the evolution of market standards, regulatory changes and client feedback.

1. Operational Items

Financial Results/Director and Auditor Reports

Sustainability Policy Recommendation: Vote for approval of financial statements and director and auditor reports, unless:

- There are concerns about the accounts presented or audit procedures used; or
- The company is not responsive to shareholder questions about specific items that should be publicly disclosed.

Approval of Non-Financial Information Statement/Report

Sustainability Policy Recommendation: Generally vote for the approval of mandatory non-financial information statement/report, unless the independent assurance services provider has raised material concerns about the information presented.

Appointment of Auditors and Auditor Fees

Sustainability Policy Recommendation: Generally vote for the reelection of auditors and proposals authorizing the board to fix auditor fees, unless:

- The name of the proposed auditors has not been published;
- There are serious concerns about the effectiveness of the auditors;
- The lead audit partner(s) has been linked with a significant auditing controversy;
- There is reason to believe that the auditor has rendered an opinion which is neither accurate nor indicative of the company's financial position;
- The lead audit partner(s) has previously served the company in an executive capacity or can otherwise be considered affiliated with the company;
- The auditors are being changed without explanation;
- Fees for non-audit services exceed either 100 percent of standard audit-related fees or any stricter limit set in local best practice recommendations or law; or
- Audit fees are undisclosed.

In circumstances where fees for non-audit services include fees related to significant one-time capital structure events, such as initial public offerings, bankruptcy emergence, and spinoffs, and the company makes public disclosure of the amount and nature of those fees that are an exception to the standard "non-audit fee" category, then such fees may be excluded from the non-audit fees considered in determining the ratio of non-audit to audit fees.

For concerns relating to the audit procedures, independence of auditors, and/or name of auditors, the Sustainability Policy will focus on the auditor election and/or the audit committee members. For concerns relating to fees paid to the auditors, the Sustainability Policy will focus on remuneration of auditors if this is a separate voting item, otherwise the Sustainability Policy would focus on the auditor election.

Appointment of Internal Statutory Auditors

Sustainability Policy Recommendation: Vote for the appointment or reelection of statutory auditors, unless:

- There are serious concerns about the statutory reports presented or the audit procedures used;
- Questions exist concerning any of the statutory auditors being appointed; or
- The auditors have previously served the company in an executive capacity or can otherwise be considered affiliated with the company.

Allocation of Income

Sustainability Policy Recommendation: Vote for approval of the allocation of income, unless:

- The dividend payout ratio has been consistently below 30% without adequate explanation; or
- The payout is excessive given the company's financial position.

Stock (Scrip) Dividend Alternative

Sustainability Policy Recommendation: Vote case-by-case on stock (scrip) dividend proposals, considering factors such as:

- Whether the proposal allows for a cash option; and
- If the proposal is in line with market standards.

Amendments to Articles of Association

Sustainability Policy Recommendation: Vote amendments to the articles of association on a case-by-case basis.

Virtual Meetings (UK/Ireland, Japan, Australia, and Europe)

Sustainability Policy Recommendation: Generally vote for proposals allowing for the convening of hybrid¹ shareholder meetings if it is clear that it is not the intention to hold virtual-only AGMs.

Generally vote against proposals allowing for the convening of virtual-only¹ shareholder meetings, except under exceptional circumstances.

Change in Company Fiscal Term

Sustainability Policy Recommendation: Vote for resolutions to change a company's fiscal term unless a company's motivation for the change is to postpone its AGM.

Lower Disclosure Threshold for Stock Ownership

Sustainability Policy Recommendation: Vote against resolutions to lower the stock ownership disclosure threshold below 5% unless specific reasons exist to implement a lower threshold.

Amend Quorum Requirements

Sustainability Policy Recommendation: Vote proposals to amend quorum requirements for shareholder meetings on a case-by-case basis.

Transact Other Business

Sustainability Policy Recommendation: Vote against other business when it appears as a voting item.

¹ The phrase "virtual-only shareholder meeting" refers to a meeting of shareholders that is held exclusively through the use of online technology without a corresponding in-person meeting. The term "hybrid shareholder meeting" refers to an in-person, or physical, meeting in which shareholders are permitted to participate online.

2. Board of Directors

Director Elections

Sustainability Policy Recommendation: Vote for management nominees in the election of directors, unless:

- Adequate disclosure has not been provided in a timely manner;
- There are clear concerns over questionable finances or restatements;
- There have been questionable transactions with conflicts of interest;
- There are any records of abuses against minority shareholder interests;
- The board fails to meet minimum corporate governance standards, including board independence standards;
- There are specific concerns about the individual, such as criminal wrongdoing or breach of fiduciary responsibilities; or
- Absences at board and key committee meetings have not been explained (in countries where this information is disclosed).

Vote for employee and/or labor representatives if they sit on either the audit or compensation committee and are required by law to be on those committees. Vote against employee and/or labor representatives if they sit on either the audit or compensation committee, if they are not required to be on those committees.

Diversity

Sustainability Advisory Services will evaluate gender diversity on boards in international markets when reviewing director elections, to the extent that disclosures and market practices permit.

Sustainability Policy Recommendation: Generally vote against or withhold from the chair of the nominating committee if the board lacks at least one director of an underrepresented gender identity².

- For **Japan**, if the company has an audit-committee-board structure or a traditional two-tier board structure as opposed to three committees, vote against incumbent representative directors if the board lacks at least one director of an underrepresented gender identity.
- For **Canada** and **Australia**, vote against or withhold from the chair of the nominating committee if the board is not comprised of at least 30 percent underrepresented gender identities.
- For the **UK**, generally vote against or withhold from the incumbent chair of the nominating committee if:
 - the board is not comprised of at least 33 percent underrepresented gender identities; or
 - the board lacks at least one racially diverse director.
- Beginning in **2023**, for **Continental European** markets, generally vote against or withhold from incumbent members of the nominating committee if the board is not comprised of at least 40 percent underrepresented gender identities.
- Vote against or withhold from other director nominees on a case-by-case basis.

² Underrepresented gender identities include directors who identify as women or as non-binary.

Material ESG Failures

Sustainability Policy Recommendation: Vote against or withhold from directors individually, on a committee, or potentially the entire board due to:

- Material failures of governance, stewardship, risk oversight,³ or fiduciary responsibilities at the company, including failure to adequately manage or mitigate environmental, social and governance (ESG) risks;
- A lack of sustainability reporting in the company's public documents and/or website in conjunction with a failure to adequately manage or mitigate ESG risks;
- Failure to replace management as appropriate; or
- Egregious actions related to the director(s)' service on the boards that raise substantial doubt about his or her ability to effectively oversee management and serve the best interests of shareholders at any company.

Climate Accountability

For companies that are significant greenhouse gas (GHG) emitters, through their operations or value chain,⁴ generally vote against the board chair, or the responsible incumbent director(s), in cases where Sustainability Advisory Services determines that the company is not taking the minimum steps needed to understand, assess, and mitigate risks related to climate change to the company and the larger economy.

For 2022, minimum steps to understand and mitigate those risks are considered to be the following. Both minimum criteria will be required to be in compliance:

- Detailed disclosure of climate-related risks, such as according to the framework established by the Task Force on Climate-related Financial Disclosures (TCFD), including:
 - Board governance measures;
 - Corporate strategy;
 - Risk management analyses; and
 - Metrics and targets.
- Appropriate GHG emissions reduction targets.

For 2022, "appropriate GHG emissions reductions targets" will be any well-defined GHG reduction targets. Expectations about what constitutes "minimum steps to mitigate risks related to climate change" will increase over time.

For director elections, Sustainability Advisory Services will also take into consideration market-specific provisions that are listed below:

Canadian Guidelines

Board Structure and Independence (TSX)

Sustainability Policy Recommendation: Vote withhold for any Executive Director or Non-Independent, Non-Executive Director where:

- The board is less than majority independent; or
- The board lacks a separate compensation or nominating committee.

³ Examples of failure of risk oversight include but are not limited to: bribery; large or serial fines or sanctions from regulatory bodies; significant environmental incidents including spills and pollution; large scale or repeat workplace fatalities or injuries; significant adverse legal judgments or settlements; or hedging of company stock.

⁴ For 2022, companies defined as "significant GHG emitters" will be those on the current Climate Action 100+ Focus Group list.

Non-Independent Directors on Key Committees (TSX)

Sustainability Policy Recommendation: Vote withhold for members of the audit, compensation, or nominating committee who:

- Are Executive Directors;
- Are Controlling Shareholders; or
- Is a Non-employee officer of the company or its affiliates if he/she is among the five most highly compensated.

Non-Independent Directors on Key Committees-TSX-V

Sustainability Policy Recommendation: Vote withhold for Executive Directors, Controlling Shareholders or a Non-employee officer of the company or its affiliates if he/she is among the five most highly compensated who:

- Are members of the audit committee;
- Are members of the compensation committee or the nominating committee and the committee is not majority independent; or
- Are board members and the entire board fulfills the role of a compensation committee or a nominating committee and the board is not majority independent.

Overboarding-TSX and Venture-Listed

Sustainability Policy Recommendation: For venture issuers this policy will apply for meetings on or after February 1, 2023. Generally vote withhold for individual director nominees who:

- Are non-CEO directors and serve on more than five public company boards; or
- Are CEOs of public companies who serve on the boards of more than two public companies besides their own – withhold only at their outside boards.⁵

Transitioning directors: It is preferable for a director to step down from a board at the annual meeting to ensure orderly transitions, which may result in a director being temporarily overboarded (e.g. joining a new board in March but stepping off another board in June). Sustainability Advisory Services will generally not count a board for policy application purposes when it is publicly-disclosed that the director will be stepping off that board at its next annual meeting. This disclosure must be included within the company's proxy circular to be taken into consideration. Conversely, Sustainability Advisory Services will include the new boards that the director is joining even if the shareholder meeting with his or her election has not yet taken place.

Externally-Managed Issuers (EMIs) – TSX and TSXV

Sustainability Policy Recommendation: Vote case-by-case on say-on-pay resolutions where provided, or on individual directors, committee members, or the entire board as appropriate, when an issuer is externally-managed and has provided minimal or no disclosure about their management services agreements and how senior management is compensated. Factors taken into consideration may include but are not limited to:

- The size and scope of the management services agreement;
- Executive compensation in comparison to issuer peers and/or similarly structured issuers;
- Overall performance;
- Related party transactions;
- Board and committee independence;
- Conflicts of interest and process for managing conflicts effectively;
- Disclosure and independence of the decision-making process involved in the selection of the management services provider;

⁵ Although a CEO's subsidiary boards will be counted as separate boards, Sustainability Advisory Services will not recommend a withhold vote for the CEO of a parent company board or any of the controlled (>50% ownership) subsidiaries of that parent but may do so at subsidiaries that are less than 50% controlled and boards outside the parent/subsidiary relationship.

- Risk mitigating factors included within the management services agreement such as fee recoupment mechanisms;
- Historical compensation concerns;
- Executives' responsibilities; and
- Other factors that may reasonably be deemed appropriate to assess an externally-managed issuer's governance framework.

Unilateral Adoption of an Advance Notice Provision

Sustainability Policy Recommendation: Generally withhold from individual directors, committee members, or the entire board as appropriate in situations where an advance notice policy has been adopted by the board but has not been included on the voting agenda at the next shareholders' meeting. Continued lack of shareholder approval of the advanced notice policy in subsequent years may result in further withhold recommendations.

European Guidelines

In **European markets**, Sustainability Advisory Services looks at different factors to make determinations regarding director elections. The following factors are taken into account:

Director Terms

For **Belgium, France, Greece, the Netherlands, Spain, and Switzerland**, vote against the election or re-election of any director when his/her term is not disclosed or when it exceeds four years and adequate explanation for non-compliance has not been provided. In these markets, the maximum board terms are either recommended best practice or required by legislation. Under best practice recommendations, companies should shorten the terms for directors when the terms exceed the limits suggested by best practices. The policy will be applied to all companies in these markets, for bundled as well as unbundled items.

For general meetings held on or after 1 February 2021, the above policy will be applied to all European companies, for bundled as well as unbundled items.

Beyond that, as directors should be accountable to shareholders on a more regular basis, the Sustainability Policy may consider moving to maximum board terms of less than four years in the future.

Sustainability Policy Recommendation: Vote against article amendment proposals to extend board terms.

In cases where a company's articles provide for a shorter limit and where the company wishes to extend director terms from three or fewer years to four years, for example, the Sustainability Policy will recommend a vote against, based on the general principle that director accountability is maximized by elections with a short period of renewal.

Bundling of Proposals to Elect Directors

Bundling together proposals that could be presented as separate voting items is not considered good market practice, because bundled resolutions leave shareholders with an all-or-nothing choice, skewing power disproportionately toward the board and away from shareholders. As director elections are one of the most important voting decisions that shareholders make, directors should be elected individually.

Sustainability Policy Recommendation: For the markets of Bulgaria, Croatia, Czech Republic, Estonia, France, Germany, Hungary, Latvia, Lithuania, Poland, Romania, Slovakia, and Slovenia, vote against the election or reelection of any directors if the company proposes a single slate of directors.

Bundled director elections in Poland may be supported for companies that go beyond market practice by disclosing the names of nominees on a timely basis.

Board Independence

Widely-held companies

A. Non-controlled companies

Sustainability Policy Recommendation: Generally vote against the election or reelection of any non-independent directors (excluding the CEO) if:

1. Fewer than 50% of the board members elected by shareholders – excluding, where relevant, employee shareholder representatives – would be independent; or
2. Fewer than one-third of all board members would be independent.

Portugal is excluded from Provision (1.) in the above-mentioned voting policy.

B. Controlled companies

Sustainability Policy Recommendation: Generally vote against the election or reelection of any non-independent directors (excluding the CEO) if less than one-third of the board members are independent.

Board Leadership

Given the importance of board leadership, Sustainability Advisory Services may consider that the chair of the board should be an independent non-executive director according to the Sustainability Advisory Services' Classification of Directors.

Non-widely held companies

Sustainability Policy Recommendation: Generally vote against the election or reelection of any non-independent directors (excluding the CEO) if less than one-third of the board members are independent.

Definition of terms

'Widely-held companies' are determined based on their membership in a major index and/or the number of Sustainability Advisory Services clients holding the securities. For Sweden, Norway, Denmark, and Finland, this is based on membership on a local blue-chip market index and/or MSCI EAFE companies. For Portugal, it is based on membership in the PSI-20 and/or MSCI EAFE index.

A company is considered to be controlled for the purposes of the above-mentioned voting policies if a shareholder, or multiple shareholders acting in concert, control a majority of the company's equity capital (i.e. 50% + one share). If a company is majority-controlled by virtue of a shareholder structure in which shareholders' voting rights do not accrue in accordance with their equity capital commitment (e.g. unequal or multi-class share structures), the company will not be classified as controlled unless the majority shareholder/majority shareholding group also holds a majority of the company's equity capital.

Disclosure of Nominee Names

Sustainability Policy Recommendation: Vote against the election or reelection of any and all director nominees when the names of the nominees are not available at the time the proxy analysis is being written.

This policy will be applied to all companies in these markets, for bundled and unbundled items.

Combined Chair/CEO

Sustainability Policy Recommendation: Generally, vote against the (re)election of combined chair/CEOs at widely-held European companies.

When the company provides assurance that the chair/CEO would only serve in the combined role on an interim basis (no more than two years), the vote recommendation would be made on a case-by-case basis.

In the above-mentioned situation, Sustainability Advisory Services will consider the rationale provided by the company and whether it has set up adequate control mechanisms on the board (such as a lead independent director, a high overall board independence, and a high level of independence on the board's key committees).

Election of Former CEO as Chair of the Board

Sustainability Policy Recommendation: Generally vote against the (re)election of a former CEO to the supervisory board or board of directors in **Austria, Germany, and the Netherlands** if the former CEO is to be chair of the relevant board. To this end, companies are expected to confirm prior to the general meeting that the former CEO will not be (re)appointed as chair of the relevant board.

Given the importance of board leadership, Sustainability Advisory Services may consider that the chair of the board should be an independent non-executive director according to Sustainability Advisory Services' Classification of Directors.

Overboarded Directors

Sustainability Policy Recommendation: In **Austria, Belgium, Denmark, Finland, France, Germany, Greece, Italy, Luxembourg, the Netherlands, Norway, Poland, Spain, Sweden, and Switzerland**, Sustainability Advisory Services will generally recommend a vote against a candidate when they hold an excessive number of board appointments, as referenced by the more stringent of the provisions prescribed in local law or best practice governance codes, or the following guidelines:

- Any person who holds more than five mandates at listed companies will be classified as overboarded. For the purposes of calculating this limit, a non-executive directorship counts as one mandate, a non-executive chair position counts as two mandates, and a position as executive director (or a comparable role) is counted as three mandates.
- Also, any person who holds the position of executive director (or a comparable role) at one company and serves as a non-executive chair at a different company will be classified as overboarded.

CEOs and Board Chairs

An adverse vote recommendation will not be applied to a director within a company where they serve as CEO; instead, any adverse vote recommendations will be applied to their additional seats on other company boards. For chairs, negative recommendations would first be applied towards non-executive, non-chair positions held, but the chair position itself would be targeted where they are being elected as chair for the first time or, when in aggregate their chair positions are three or more in number, or if the chair holds an outside executive position.

One Board Seat per Director

Sustainability Policy Recommendation: In cases where a director holds more than one board seat on a single board and the corresponding votes, manifested as one seat as a physical person plus an additional seat(s) as a representative of a legal entity, vote against the election/re-election of such legal entities and in favor of the physical person.

However, an exception is made if the representative of the legal entity holds the position of CEO. In such circumstances, the Sustainability Policy will typically recommend a vote in favor of the legal entity and against the election/re-election of the physical person.

While such occurrences are rare, there have been cases where a board member may have multiple board seats and corresponding votes. Holding several board seats concurrently within one board increases this person's direct influence on board decisions and creates an inequality among board members.

This situation has manifested in Belgium, Luxembourg, and France. This is not a good corporate governance practice, as it places disproportionate influence and control in one person.

Composition of Committees

Sustainability Policy Recommendation:

For widely-held companies

Generally vote against the (re)election of any non-independent members of the audit committee if:

- Fewer than 50% of the audit committee members, who are elected by shareholders in such capacity or another – excluding, where relevant, employee shareholder representatives – would be independent; or
- Fewer than one-third of all audit committee members would be independent.

For companies whose boards are legally required to have 50% of directors not elected by shareholders, the second criterion is not applicable.

Generally vote against the election or re-election of the non-independent member of the audit committee designated as chair of that committee.

For widely-held companies in **Belgium, the Netherlands, and Switzerland**, vote against the (re)election of non-independent members of the audit committee and/or the remuneration committee if their (re)election would lead to a non-independent majority on the respective committee.

For all companies:

In **Belgium, Denmark, Finland, France, Iceland, Luxembourg, the Netherlands, Norway, Spain, Sweden, and Switzerland**, vote against the (re)election of executives who serve on the company's audit or remuneration committee. Sustainability Advisory Services may recommend against if the disclosure is too poor to determine whether an executive serves or will serve on a committee. If a company does not have an audit or a remuneration committee, Sustainability Advisory Services may consider that the entire board fulfills the role of a committee. In such case, Sustainability Advisory Services may recommend against the executives, including the CEO, up for election to the board.

Voto di Lista (Italy)

In Italy, director elections generally take place through the voto di lista mechanism (similar to slate elections). Since the Italian implementation of the European Shareholder Rights Directive (effective since Nov. 1, 2010), Italian issuers whose shares are listed on the Italian regulated market Mercato Telematico Azionario must publish the various lists 21 days in advance of the meeting.

Since shareholders only have the option to support one such list, where lists are published in sufficient time, Sustainability Advisory Services will recommend a vote on a case-by-case basis, determining which list of nominees it considers is best suited to add value for shareholders.

Those companies that are excluded from the provisions of the European Shareholder Rights Directive generally publish lists of nominees seven days before the meeting. In the case where nominees are not published in sufficient time, Sustainability Advisory Services will recommend a vote against the director elections before the lists of director nominees are disclosed. Once the various lists of nominees are disclosed, Sustainability Advisory Services will issue an alert to its clients and, if appropriate, change its vote recommendation to support one particular list.

The Florange Act (France) – Double Voting Rights

Sustainability Policy Recommendation:

For French companies that:

- Did not have a bylaw allowing for double voting rights before the enactment of the Law of 29 March 2014 (Florange Act); and
- Do not currently have a bylaw prohibiting double-voting rights; and either
- Do not have on their ballot for shareholder approval a bylaw amendment to prohibit double-voting, submitted by either management or shareholders; or
- Have not made a public commitment to submit such a bylaw amendment to shareholder vote before 3 April 2016;

Then, on a case-by-case basis, Sustainability Advisory Services may recommend against the following types of proposals:

- The reelection of directors or supervisory board members; or
- The approval of the discharge of directors; or
- If neither reelection of directors/supervisory board members nor approval of discharge is considered appropriate, then the approval of the annual report and accounts.

Composition of the Nominating Committee (Sweden/Norway/Finland)

Vote for proposals in **Finland, Iceland, Norway, and Sweden** to elect or appoint a nominating committee consisting mainly of non-board members.

Vote for shareholder proposals calling for disclosure of the names of the proposed candidates at the meeting, as well as the inclusion of a representative of minority shareholders in the committee.

Vote against proposals where the names of the candidates (in the case of an election) or the principles for the establishment of the committee have not been disclosed in a timely manner.

Vote against proposals in Sweden to elect or appoint such a committee if the company is on the MSCI-EAFE or local main index and the following conditions exist:

- A member of the executive management would be a member of the committee;
- More than one board member who is dependent on a major shareholder would be on the committee; or
- The chair of the board would also be the chair of the committee.

In cases where the principles for the establishment of the nominating committee, rather than the election of the committee itself, are being voted on, vote against the adoption of the principles if any of the above conditions are met for the current committee, and there is no publicly available information indicating that this would no longer be the case for the new nominating committee.

Election of Censors (France)

For widely held companies, the Sustainability Policy will generally recommend a vote against proposals seeking shareholder approval to elect a censor, to amend bylaws to authorize the appointment of censors, or to extend the maximum number of censors to the board.

However, the Sustainability Policy will recommend a vote on a case-by-case basis when the company provides assurance that the censor would serve on a short-term basis (maximum one year) with the intent to retain the nominee before his/her election as director. In this case, consideration shall also be given to the nominee's situation (notably overboarding or other factors of concern).

In consideration of the principle that censors should be appointed on a short-term basis, vote against any proposal to renew the term of a censor or to extend the statutory term of censors.

Please see the International Classification of Directors on the following page.

Cumulative Voting – Middle East and Africa (MEA)

Under a cumulative voting system, each share represents a number of votes equal to the size of the board that will be elected. These votes may be apportioned equally among the candidates or, if a shareholder wishes to exclude some nominees, among the desired candidates.

For MEA markets, when directors are elected through a cumulative voting system, or when the number of nominees exceeds the number of board vacancies, vote case-by-case on directors, taking into consideration additional factors to identify the nominees best suited to add value for shareholders.

Sustainability Policy Recommendation: Generally vote to abstain from all candidates if the disclosure provided by the company is not sufficient to allow the assessment of independence and the support of all proposed candidates on equal terms.

If the disclosure is sufficient to allow an assessment of the independence of proposed candidates, generally vote in favor of the following types of candidates:

- Candidates who can be identified as representatives of minority shareholders of the company, or independent candidates:
- Candidates whose professional background may have the following benefits:
 - Increasing the diversity of incumbent directors' professional profiles and skills (thanks to their financial expertise, international experience, executive positions/directorships at other listed companies, or other relevant factors).
 - Bringing to the current board of directors relevant experience in areas linked to the company's business, evidenced by current or past board memberships or management functions at other companies.
- Incumbent board members and candidates explicitly supported by the company's management.

Classification of Directors – International Policy

Executive Director

- Employee or executive of the company or a wholly-owned subsidiary of the company;
- Any director who is classified as a non-executive, but receives salary, fees, bonus, and/or other benefits that are in line with the highest-paid executives of the company.

Non-Independent Non-Executive Director (NED)

- Any director who is attested by the board to be a non-independent NED;
- Any director specifically designated as a representative of a shareholder of the company;
- Any director who is also an employee or executive of a significant⁶ shareholder of the company;
- Any director who is also an employee or executive of a subsidiary, associate, joint venture, or company that is affiliated with a significant⁴ shareholder of the company;
- Any director who is nominated by a dissenting significant shareholder unless there is a clear lack of material⁷ connection with the dissident, either currently or historically;
- Beneficial owner (direct or indirect) of at least 10% of the company's stock, either in economic terms or in voting rights (this may be aggregated if voting power is distributed among more than one member of a defined group, e.g., members of a family that beneficially own less than 10% individually, but collectively own more than 10%), unless market best practice dictates a lower ownership and/or disclosure threshold (and in other special market-specific circumstances);
- Government representative;
- Currently provides or has provided (or a relative⁸ provides) professional services⁹ to the company, to an affiliate of the company, or to an individual officer of the company or of one of its affiliates in the latest fiscal year in excess of USD 10,000 per year;
- Represents customer, supplier, creditor, banker, or other entity with which the company maintains a transactional/commercial relationship (unless the company discloses information to apply a materiality test⁶);
- Any director who has a conflicting relationship with the company, including but not limited to cross-directorships with executive directors or the chair of the company;

Relative¹⁰ of a current or former executive of the company or its affiliates;

- A new appointee elected other than by a formal process through the general meeting (such as a contractual appointment by a substantial shareholder);
- Founder/co-founder/member of founding family but not currently an employee or executive;
- Former executive or employee (five-year cooling off period);
- Years of service are generally not a determining factor unless a recommended best practice in a market and/or in extreme circumstances, in which case they may be considered.¹¹
- Any additional relationship or principle considered to compromise independence under local corporate governance best practice guidance.¹²

6 At least 10% of the company's stock, unless market best practice dictates a lower ownership and/or disclosure threshold.

7 For purposes of Sustainability Advisory Services' director independence classification, "material" will be defined as a standard of relationship financial, personal, or otherwise that a reasonable person might conclude could potentially influence one's objectivity in the boardroom in a manner that would have a meaningful impact on an individual's ability to satisfy requisite fiduciary standards on behalf of shareholders.

8 "Relative" follows the definition of "immediate family members" which covers spouses, parents, children, stepparents, step-children, siblings, in-laws, and any person (other than a tenant or employee) sharing the household of any director, nominee for director, executive officer, or significant shareholder of the company.

9 Professional services can be characterized as advisory in nature and generally include the following: investment banking/financial advisory services; commercial banking (beyond deposit services); investment services; insurance services; accounting/audit services; consulting services; marketing services; and legal services. The case of participation in a banking syndicate by a non-lead bank should be considered a transaction (and hence subject to the associated materiality test) rather than a professional relationship.

10 "Relative" follows the definition of "immediate family members" which covers spouses, parents, children, stepparents, step-children, siblings, in-laws, and any person (other than a tenant or employee) sharing the household of any director, nominee for director, executive officer, or significant shareholder of the company.

11 For example, in continental Europe and Latin America, directors with a tenure exceeding 12 years will be considered non-independent. In the United Kingdom, Ireland, Hong Kong and Singapore, directors with a tenure exceeding nine years will be considered non-independent, unless the company provides sufficient and clear justification that the director is independent despite his long tenure. For purposes of independence classification of directors incorporated in the Middle East and Africa region, this criterion will be taken into account in accordance with market best practice and disclosure standards and availability.

12 For MEA markets, directors' past services as statutory auditor/partner of the statutory audit firm will be taken into account, with cooling-off periods in accordance with local market best practice.

Independent NED

- No material¹³ connection, either direct or indirect, to the company (other than a board seat) or to a significant shareholder.

Employee Representative

- Represents employees or employee shareholders of the company (classified as “employee representative” and considered a non-independent NED).

Contested Director Elections

Sustainability Policy Recommendation: For contested elections of directors, e.g. the election of shareholder nominees or the dismissal of incumbent directors, the Sustainability Policy will make its recommendation on a case-by-case basis, determining which directors are considered best suited to add value for shareholders.

The analysis will generally be based on, but not limited to, the following major decision factors:

- Company performance relative to its peers;
- Strategy of the incumbents versus the dissidents;
- Independence of directors/nominees;
- Experience and skills of board candidates;
- Governance profile of the company;
- Evidence of management entrenchment;
- Responsiveness to shareholders;
- Whether a takeover offer has been rebuffed; and
- Whether minority or majority representation is being sought.

When analyzing a contested election of directors, Sustainability will generally focus on two central questions: (1) Have the proponents proved that board change is warranted? And if so, (2) Are the proponent board nominees likely to effect positive change (i.e., maximize long-term shareholder value)?

Discharge of Board and Management

Sustainability Policy Recommendation: Generally vote for discharge of directors, including members of the management board and/or supervisory board, unless there is reliable information about significant and compelling controversies that the board is not fulfilling its fiduciary duties such as:

- A lack of oversight or actions by board members that invoke shareholder distrust related to malfeasance or poor supervision, such as operating in private or company interest rather than in shareholder interest;
- Any legal issues (e.g. civil/criminal) aiming to hold the board responsible for breach of trust in the past or
- related to currently alleged actions yet to be confirmed (and not only the fiscal year in question), such as price fixing, insider trading, bribery, fraud, and other illegal actions; or
- Other material failures of governance or fiduciary responsibilities at the company, including failure to adequately manage or mitigate environmental, social and governance (ESG) risks; or
- A lack of sustainability reporting in the company’s public documents and/or website in conjunction with a failure to adequately manage or mitigate environmental, social and governance (ESG) risks.

¹³ For purposes of Sustainability Advisory Services’ director independence classification, “material” will be defined as a standard of relationship financial, personal, or otherwise that a reasonable person might conclude could potentially influence one’s objectivity in the boardroom in a manner that would have a meaningful impact on an individual’s ability to satisfy requisite fiduciary standards on behalf of shareholders.

For markets that do not routinely request discharge resolutions (e.g. common law countries or markets where discharge is not mandatory), analysts may voice concern in other appropriate agenda items, such as approval of the annual accounts or other relevant resolutions, to enable shareholders to express discontent with the board.

Vote against proposals to remove approval of discharge of board and management from the agenda.

Director, Officer, and Auditor Indemnification and Liability Provisions

Sustainability Policy Recommendation:

- Vote proposals seeking indemnification and liability protection for directors and officers on a case-by-case basis.
- Vote against proposals to indemnify auditors.

Board Structure

Sustainability Policy Recommendation:

- Vote for proposals to fix board size.
- Vote against the introduction of classified boards and mandatory retirement ages for directors.
- Vote against proposals to alter board structure or size in the context of a fight for control of the company or the board.

3. Capital Structure

Share Issuance Requests

General Issuances:

Sustainability Policy Recommendation: Evaluate share issuance requests on a case-by-case basis taking into consideration market-specific guidelines as applicable.

For European markets, vote for issuance authorities with preemptive rights to a maximum of 50 percent over currently issued capital and as long as the share issuance authorities' periods are clearly disclosed (or implied by the application of a legal maximum duration) and in line with market-specific practices and/or recommended guidelines (e.g. issuance periods limited to 18 months for the **Netherlands**).

Vote for issuance authorities without preemptive rights to a maximum of 10 percent (or a lower limit if local market best practice recommendations provide) of currently issued capital as long as the share issuance authorities' periods are clearly disclosed (or implied by the application of a legal maximum duration) and in line with market-specific practices and/or recommended guidelines (e.g. issuance periods limited to 18 months for the **Netherlands**).

These thresholds are mutually exclusive.

When calculating the defined limits, all authorized and conditional capital authorizations are considered, including existing authorizations that will remain valid beyond the concerned shareholders' meeting.

For **UK** and **Irish** companies, generally vote for a resolution to authorize the issuance of equity, unless:

- The general issuance authority exceeds one-third (33 percent) of the issued share capital. Assuming it is no more than one-third, a further one-third of the issued share capital may also be applied to a fully pre-emptive rights issue taking the acceptable aggregate authority to two-thirds (66 percent);
- The routine authority to disapply preemption rights exceeds 10 percent of the issued share capital, provided that any amount above 5 percent is to be used for the purposes of an acquisition or a specified capital investment.

For **French** companies:

- Vote for general issuance requests with preemptive rights, or without preemptive rights but with a binding "priority right," for a maximum of 50 percent over currently issued capital.
- Generally vote for general authorities to issue shares without preemptive rights up to a maximum of 10 percent of share capital. When companies are listed on a regulated market, the maximum discount on share issuance price proposed in the resolution must, in addition, comply with the legal discount for a vote for to be warranted.

For **Hong Kong** companies, generally vote for the general issuance mandate for companies that:

- Limit the issuance request to 10% or less of the relevant class of issued share capital;
- Limit the discount to 10% of the market price of shares; and
- Have no history of renewing the General Issuance Mandate several times within a period of one year, which may result in the share issuance limit exceeding 10% of the relevant class of issued share capital within the 12-month period.

Generally vote for a general issuance of equity or equity-linked securities without preemptive rights when the share issuance limit is not more than 10 percent of the company's issued share capital and 50 percent with preemptive rights for all **Singapore** companies, with the exception of Catalyst-listed companies and Real Estate Investment Trusts.

For **Singapore** companies listed on the Catalyst market of the SGX, generally vote for a general issuance of equity or equity-linked securities without preemptive rights when the share issuance limit is not more than 20% of the company's issued share capital and 100% with preemptive rights. For Real Estate Investment Trusts, generally vote for a general issuance of equity or equity-linked securities without preemptive rights when the unit issuance limit is not more than 20% of its issued unit capital and 50% with preemptive rights.

For companies listed on the Main Market and ACE Market of the Bursa Malaysia Securities Bhd (Exchange), vote for issuance requests without preemptive rights to a maximum of 10% of currently issued capital. For real estate investment trusts (REITs), vote for issuance requests without preemptive rights to a maximum of 20% of currently issued capital.

For **Latin American** companies, generally vote for issuance requests with preemptive rights to a maximum of 100% over currently issued capital. Vote for issuance requests without preemptive rights to a maximum of 20% of currently issued capital. Specific Issuances requested will be evaluated on a case-by-case basis.

For shelf registration programs at Latin American companies (**Argentina, Colombia, Chile, Mexico and Peru**), vote on a case-by-case basis on all requests, with or without preemptive rights. Approval of a multi-year authority for the issuance of securities under Shelf Registration Programs will be considered on a case-by-case basis, taking into consideration, but not limited to, the following:

- Whether the company has provided adequate and timely disclosure including detailed information regarding the rationale for the proposed program;
- Whether the proposed amount to be approved under such authority, the use of the resources, the length of the authorization, the nature of the securities to be issued under such authority, including any potential risk of dilution to shareholders is disclosed; and
- Whether there are concerns regarding questionable finances, the use of the proceeds, or other governance concerns.

Increases in Authorized Capital

Sustainability Policy Recommendation: Vote for proposals to increase authorized capital on a case-by-case basis if such proposals do not include the authorization to issue shares from the (pre-) approved limit.

In case the proposals to increase authorized capital include the authorization to issue shares according to the (pre-)approved limit without obtaining separate shareholder approval, the general issuance policy applies.

Reduction of Capital

Sustainability Policy Recommendation: Vote for proposals to reduce capital for routine accounting purposes unless the terms are unfavorable to shareholders.

Vote proposals to reduce capital in connection with corporate restructuring on a case-by-case basis.

Capital Structures

Sustainability Policy Recommendation: Vote for resolutions that seek to maintain or convert to a one-share, one-vote capital structure.

Vote against requests for the creation or continuation of dual-class capital structures or the creation of new or additional supervoting shares.

Preferred Stock

Sustainability Policy Recommendation:

- Vote for the creation of a new class of preferred stock or for issuances of preferred stock up to 50% of issued capital unless the terms of the preferred stock would adversely affect the rights of existing shareholders.
- Vote for the creation/issuance of convertible preferred stock as long as the maximum number of common shares that could be issued upon conversion meets the guidelines on equity issuance requests.
- Vote against the creation of a new class of preference shares that would carry superior voting rights to the common shares.
- Vote against the creation of blank check preferred stock unless the board clearly states that the authorization will not be used to thwart a takeover bid.
- Vote proposals to increase blank check preferred authorizations on a case-by-case basis.

Debt Issuance Requests

Sustainability Policy Recommendation: Vote non-convertible debt issuance requests on a case-by-case basis, with or without pre-emptive rights.

Vote for the creation/issuance of convertible debt instruments as long as the maximum number of common shares that could be issued upon conversion meets the guidelines on equity issuance requests.

Vote for proposals to restructure existing debt arrangements unless the terms of the restructuring would adversely affect the rights of shareholders.

Pledging of Assets for Debt

Sustainability Policy Recommendation: Vote proposals to approve the pledging of assets for debt on a case-by-case basis.

Increase in Borrowing Powers

Sustainability Policy Recommendation: Vote proposals to approve increases in a company's borrowing powers on a case-by-case basis.

Share Repurchase Plans

Sustainability Policy Recommendation: Generally vote for market repurchase authorities (share repurchase programs) if the terms comply with the following criteria:

- A repurchase limit of up to 10% of issued share capital;
- A holding limit of up to 10% of a company's issued share capital in treasury ("on the shelf"); and
- Duration of no more than five years, or such lower threshold as may be set by applicable law, regulation, or code of governance best practice.

Authorities to repurchase shares in excess of the 10% repurchase limit will be assessed on a case-by-case basis. The Sustainability Policy may support such share repurchase authorities under special circumstances, which are required to be publicly disclosed by the company, provided that, on balance, the proposal is in shareholders' interests. In such cases, the authority must comply with the following criteria:

- A holding limit of up to 10% of a company's issued share capital in treasury ("on the shelf"); and
- Duration of no more than 18 months.

In markets where it is normal practice not to provide a repurchase limit, the Sustainability Policy will evaluate the proposal based on the company's historical practice. However, the Sustainability Policy expects companies to disclose such limits and, in the future, may recommend a vote against companies that fail to do so. In such cases, the authority must comply with the following criteria:

- A holding limit of up to 10% of a company's issued share capital in treasury ("on the shelf"); and
- Duration of no more than 18 months.

In addition, the Sustainability Policy will recommend against any proposal where:

- The repurchase can be used for takeover defenses;
- There is clear evidence of abuse;
- There is no safeguard against selective buybacks;
- Pricing provisions and safeguards are deemed to be unreasonable in light of market practice.

Market-Specific Exceptions

For Italy and Germany, vote for share repurchase plans and share reissuance plans that would use call and put options if the following criteria are met:

- The duration of the option is limited in time to no more than 18 months;
- The total number of shares covered by the authorization is disclosed;
- The number of shares that would be purchased with call options and/or sold with put options is limited to a maximum of 5% of currently outstanding capital (or half of the total amounts allowed by law in Italy and Germany);
- A financial institution, with experience conducting sophisticated transactions, is indicated as the party responsible for the trading; and
- The company has a clean track record regarding repurchases.

For Singapore, generally vote for resolutions authorizing the company to repurchase its own shares, unless the premium over the average trading price of the shares as implied by the maximum price paid exceeds 5% for on-market repurchases and 20% for off-market repurchases.

Reissuance of Shares Repurchased

Sustainability Policy Recommendation: Vote for requests to reissue any repurchased shares unless there is clear evidence of abuse of this authority in the past.

Capitalization of Reserves for Bonus Issues/Increase in Par Value

Sustainability Policy Recommendation: Vote for requests to capitalize reserves for bonus issues of shares or to increase par value.

Private Placement

Sustainability Policy Recommendation: For Canadian companies, vote case-by-case on private placement issuances taking into account:

- Whether other resolutions are bundled with the issuance;
- Whether the rationale for the private placement issuance is disclosed;
- Dilution to existing shareholders' position:
 - issuance that represents no more than 30% of the company's outstanding shares on a non-diluted basis is considered generally acceptable;
- Discount/premium in issuance price to the unaffected share price before the announcement of the private placement;
- Market reaction: The market's response to the proposed private placement since announcement; and
- Other applicable factors, including conflict of interest, change in control/management, evaluation of other alternatives.

Generally vote for the private placement issuance if it is expected that the company will file for bankruptcy if the transaction is not approved or the company's auditor/management has indicated that the company has going concern issues.

4. Compensation

Preamble

The assessment of compensation follows the Sustainability Global Principles on Executive and Director Compensation that are detailed below. These principles take into account global corporate governance best practice.

The Global Principles on Compensation underlie market-specific policies in all markets:

- Provide shareholders with clear, comprehensive compensation disclosures;
- Maintain appropriate pay structure with emphasis on long-term shareholder value;
- Avoid arrangements that risk “pay for failure”;
- Maintain an independent and effective compensation committee;
- Avoid inappropriate pay to non-executive directors.

European Guidelines

In line with European Commission Recommendation 2004/913/EC, Sustainability believes that seeking annual shareholder approval for a company's compensation policy is a positive corporate governance provision.

In applying the Five Global Principles, the Sustainability Policy has formulated European Compensation Guidelines that take into account local codes of governance, market best practice, and the Recommendations published by the European Commission. The Sustainability Policy analyzes compensation-related proposals based on the role of the beneficiaries and has therefore divided its executive and director compensation policy into two domains:

- Executive compensation-related proposals; and
- Non-executive director compensation-related proposals

Executive Compensation-Related Proposals

Sustainability Advisory Services will evaluate management proposals seeking ratification of a company's executive compensation-related items on a case-by-case basis, and, where relevant, will take into account the European Pay for Performance (EP4P) model¹⁴ outcomes within a qualitative review of a company's remuneration practices.

Sustainability Policy Recommendation: Sustainability Advisory Services will generally recommend a vote against a company's compensation-related proposal if such proposal fails to comply with one or a combination of several of the global principles and their corresponding rules:

14 Definition of Pay-for-Performance Evaluation:

Sustainability Advisory Services annually conducts a pay-for-performance analysis to measure the alignment between pay and performance over a sustained period. With respect to companies in the European Main Indices, this analysis considers the following:

- Peer Group Alignment:
 - The degree of alignment between the company's annualized TSR rank and the CEO's annualized total pay rank within a peer group, each measured over a three-year period.
 - The multiple of the CEO's total pay relative to the peer group median.
- Absolute Alignment – the absolute alignment between the trend in CEO pay and company TSR over the prior five fiscal years – i.e., the difference between the trend in annual pay changes and the trend in annualized TSR during the period.

- Provide shareholders with clear and comprehensive compensation disclosures:
 - Information on compensation-related proposals shall be made available to shareholders in a timely manner;
 - The level of disclosure of the proposed compensation policy and remuneration report shall be sufficient for shareholders to make an informed decision and shall be in line with what local market best practice standards dictate;
 - Remuneration report disclosure is expected to include amongst others: amounts paid to executives, alignment between company performance and payout to executives, disclosure of variable incentive targets and according levels of achievement and performance awards made, after the relevant performance period (ex-post), and disclosure and explanation of use of any discretionary authority or derogation clause by the board or remuneration committee to adjust pay outcomes.
 - Companies are expected to provide meaningful information regarding the average remuneration of employees of the company, in a manner which permits comparison with directors' remuneration.
 - Companies shall adequately disclose all elements of the compensation, including:
 - Any short- or long-term compensation component must include a maximum award limit.
 - Long-term incentive plans must provide sufficient disclosure of (i) the exercise price/ strike price (options); (ii) discount on grant; (iii) grant date/period; (iv) exercise/ vesting period; and, if applicable, (v) performance criteria.
 - Discretionary payments, if applicable.
 - The derogation policy, if applicable, which shall clearly define and limit any elements (e.g., base salary, STI, LTI, etc.) and extent (e.g., caps, weightings, etc.) to which derogations may apply.
- Maintain appropriate pay structure with emphasis on long-term shareholder value:
 - The structure of the company's short-term incentive plan shall be appropriate.
 - The compensation policy must notably avoid guaranteed or discretionary compensation.
 - The structure of the company's long-term incentives shall be appropriate, including, but not limited to, dilution, vesting period, and, if applicable, performance conditions.
 - Equity-based plans or awards that are linked to long-term company performance will be evaluated using Sustainability Advisory Services' general policy for equity-based plans; and
 - For awards granted to executives, Sustainability Advisory Services will generally require a clear link between shareholder value and awards, and stringent performance-based elements.
 - The balance between short- and long-term variable compensation shall be appropriate.
 - The company's executive compensation policy must notably avoid disproportionate focus on short-term variable element(s)
- Avoid arrangements that risk "pay for failure":
 - The board shall demonstrate good stewardship of investor's interests regarding executive compensation practices (principle being supported by Pay for Performance Evaluation).
 - There shall be a clear link between the company's performance and variable incentives. Financial and non-financial conditions, including ESG criteria, are relevant as long as they reward an effective performance in line with the purpose, strategy, and objectives adopted by the company.
 - There shall not be significant discrepancies between the company's performance, financial and non-financial, and real executive payouts.

- The level of pay for the CEO and members of executive management should not be excessive relative to peers, company performance, and market practices.
- Significant pay increases shall be explained by a detailed and compelling disclosure.
- Termination payments¹⁵ must not be in excess of (i) 24 months' pay or of (ii) any more restrictive provision pursuant to local legal requirements and/or market best practices.
- Arrangements with a company executive regarding pensions and post-mandate exercise of equity-based awards must not result in an adverse impact on shareholders' interests or be misaligned with good market practices.
- Maintain an independent and effective compensation committee:
 - No executives may serve on the compensation committee.
 - In certain markets the compensation committee shall be composed of a majority of independent members, as per Sustainability Advisory Services policies on director election and board or committee composition.
 - Compensation committees should use the discretion afforded them by shareholders to ensure that rewards properly reflect business performance.¹⁶

Non-Executive Director Compensation

- Avoid inappropriate pay to non-executive directors.

Sustainability Policy Recommendation: Generally vote for proposals to award cash fees to non-executive directors.

Vote against where:

- Documents (including general meeting documents, annual report) provided prior to the general meeting do not mention fees paid to non-executive directors.
- Proposed amounts are excessive relative to other companies in the country or industry.
- The company intends to increase the fees excessively in comparison with market/sector practices, without stating compelling reasons that justify the increase.
- Proposals provide for the granting of stock options, performance-based equity compensation (including stock appreciation rights and performance-vesting restricted stock), and performance-based cash to non-executive directors.
- Proposals introduce retirement benefits for non-executive directors.

Vote on a case-by-case basis where:

- Proposals include both cash and share-based components to non-executive directors.
- Proposals bundle compensation for both non-executive and executive directors into a single resolution.

¹⁵ Termination payments' means any payment linked to early termination of contracts for executive or managing directors, including payments related to the duration of a notice period or a non-competition clause included in the contract.

¹⁶ In cases where a remuneration committee uses its discretion to determine payments, it should provide a clear explanation of its reasons, which are expected to be clearly justified by the financial results and the underlying performance of the company. The remuneration committee should disclose how it has taken into account any relevant environmental, social, and governance (ESG) matters when determining remuneration outcomes. Such factors may include (but are not limited to): workplace fatalities and injuries, significant environmental incidents, large or serial fines or sanctions from regulatory bodies and/or significant adverse legal judgments or settlements. It is relatively rare that a remuneration committee chooses to amend the targets used for either the annual bonus or the LTIP following the start of the performance period, but where this has occurred, it is good practice for the company to demonstrate how the revised targets are in practice no less challenging than the targets which were originally set.

Equity-Based Compensation Guidelines

Sustainability Policy Recommendation: Generally vote for equity based compensation proposals or the like if the plan(s) is(are) in line with long-term shareholder interests and align the award with shareholder value. This assessment includes, but is not limited to, the following factors:

- The volume of awards (to be) transferred to participants under all outstanding plans must not be excessive: the awards must not exceed 5 percent of a company's issued share capital. This number can be up to 10 percent for high-growth companies or particularly well-designed plans (e.g., with challenging performance criteria, extended vesting/performance period, etc).
- The plan(s) must be sufficiently long-term in nature/structure: the vesting of awards (i) must occur no less than three years from the grant date, and (ii) if applicable, should be conditioned on meeting performance targets that are measured over a period of at least three consecutive years;
- If applicable, performance criteria must be fully disclosed, measurable, quantifiable, and long-term oriented.
- The awards must be granted at market price. Discounts, if any, must be mitigated by performance criteria or other features that justify such discount.

Market-specific provisions for France:

- The potential volume from equity-based compensation plans must not exceed 10% of fully diluted issued share capital.
- In addition, for companies that refer to the AFEP-MEDEF Code, all awards (including stock options and warrants) to executives shall be conditional upon challenging performance criteria or premium pricing. For companies referring to the Middledenext Code (or not referring to any code) at least part of the awards to executives shall be conditional upon performance criteria or premium pricing. In both cases, free shares shall remain subject to performance criteria for all beneficiaries.

Finally, for large and mid cap companies, the company's average three-year unadjusted burn rate (or, if lower, on the maximum volume per year implied by the proposal made at the general meeting) must not exceed the mean plus one standard deviation of its sector but no more than one percentage point from the prior year sector cap.

Employee Share Purchase Plans

Sustainability Policy Recommendation: Generally vote for employee stock purchase plans if the number of shares allocated to the plan is 10% or less of the company's issued share capital.

Compensation-Related Voting Sanctions

Should a company be deemed:

- To have egregious remuneration practices;
- To have failed to follow market practice by not submitting expected resolutions on executive compensation; or
- To have failed to respond to significant shareholder dissent on remuneration-related proposals;

an adverse vote recommendation could be applied to any of the following on a case-by case basis:

- The reelection of the chair of the remuneration committee or, where relevant, any other members of the remuneration committee;
- The reelection of the board chair;
- The discharge of directors; or
- The annual report and accounts.

This recommendation could be made in addition to other adverse recommendations under existing remuneration proposals (if any).

Stock Option Plans – Adjustment for Dividend (Nordic Region)

Sustainability Policy Recommendation: Vote against stock option plans in Denmark, Finland, Norway, and Sweden if evidence is found that they contain provisions that may result in a disconnect between shareholder value and employee/executive reward.

This includes one or a combination of the following:

- Adjusting the strike price for future ordinary dividends AND including expected dividend yield above 0% when determining the number of options awarded under the plan;
- Having significantly higher expected dividends than actual historical dividends;
- Favorably adjusting the terms of existing options plans without valid reason; and/or
- Any other provisions or performance measures that result in undue award.

This policy applies to both new plans and amendments to introduce the provisions into already existing stock option plans. The Sustainability Policy will make an exception if a company proposes to reduce the strike price by the amount of future special (extraordinary) dividends only.

Generally vote against if the potential increase of share capital amounts to more than 5% for mature companies or 10% for growth companies or if options may be exercised below the market price of the share at the date of grant, or that employee options do not lapse if employment is terminated.

Share Matching Plans (Sweden and Norway)

Sustainability Policy Recommendation:

The Sustainability Policy considers the following factors when evaluating share matching plans:

- For every share matching plan, Sustainability requires a holding period.
- For plans without performance criteria, the shares must be purchased at market price.
- For broad-based share matching plans directed at all employees, Sustainability accepts an arrangement up to a 1:1 ratio, i.e. no more than one free share is awarded for every share purchased at market value.

In addition, for plans directed at executives, we require that sufficiently challenging performance criteria be attached to the plan. Higher discounts demand proportionally higher performance criteria.

The dilution of the plan when combined with the dilution from any other proposed or outstanding employee stock purchase/stock matching plans, must comply with the Sustainability guidelines.

Canadian Guidelines

Sustainability Policy Recommendation: Evaluate executive pay and practices, as well as certain aspects of outside director compensation on a case-by-case basis.

Vote against management say on pay (MSOP) proposals, withhold from compensation committee members (or in rare cases where the full board is deemed responsible, all directors including the CEO), and/or against an equity-based incentive plan proposal if:

- There is a misalignment between CEO pay and company performance (pay for performance);
- The company maintains problematic pay practices; or
- The board exhibits poor communication and responsiveness to shareholders.

Pay for Performance:

- Rationale for determining compensation (e.g. why certain elements and pay targets are used, how they are used in relation to the company's business strategy, and specific incentive plan goals, especially retrospective goals) and linkage of compensation to long-term performance;
- Evaluation of peer group benchmarking used to set target pay or award opportunities;
- Analysis of company performance and executive pay trends over time, taking into account our Pay-for-Performance policy;
- Mix of fixed versus variable and performance versus non-performance-based pay.

Pay Practices:

- Assessment of compensation components included in the Problematic Pay Practices policy such as: perks, severance packages, employee loans, supplemental executive pension plans, internal pay disparity and equity plan practices (including option backdating, repricing, option exchanges, or cancellations/surrenders and re-grants, etc.);
- Existence of measures that discourage excessive risk taking that include but are not limited to: clawbacks, holdbacks, stock ownership requirements, deferred compensation practices etc.

Board Communications and Responsiveness:

- Clarity of disclosure (e.g. whether the company's Form 51-102F6 disclosure provides timely, accurate, clear information about compensation practices in both tabular format and narrative discussion);
- Assessment of board's responsiveness to investor concerns on compensation issues (e.g. whether the company engaged with shareholders and / or responded to majority-supported shareholder proposals relating to executive pay).

Advisory Vote on Executive Compensation (Say-on-Pay) Management Proposals

Sustainability Policy Recommendation: Vote case-by-case on management proposals for an advisory shareholder vote on executive compensation. Vote against these resolutions in cases where boards have failed to demonstrate good stewardship of investors' interests regarding executive compensation practices.

In general, the management say on pay (MSOP) ballot item is the primary focus of voting on executive pay practices – dissatisfaction with compensation practices can be expressed by voting against MSOP rather than withholding or voting against the compensation committee. However, if there is no MSOP on the ballot, then the negative vote will apply to members of the compensation committee. In addition, in egregious cases, or if the board fails to respond to concerns raised by a prior MSOP proposal, then vote against or withhold from compensation committee members (or, if the full board is deemed accountable, all directors). If the negative factors involve equity-based compensation, then vote against an equity-based plan proposal presented for shareholder approval.

Equity Compensation Plans

Sustainability Policy Recommendation: Vote case-by-case on equity-based compensation plans using an “equity plan scorecard” (EPSC) approach. Under this approach, certain features and practices related to the plan¹⁷ are assessed in combination, with positively-assessed factors potentially counterbalancing negatively-assessed factors and vice-versa. Factors are grouped into three pillars:

- **Plan Cost:** The total estimated cost of the company’s equity plans relative to industry/ market cap peers, measured by the company’s estimated Shareholder Value Transfer (SVT) in relation to peers and considering both:
 - SVT based on new shares requested plus shares remaining for future grants, plus outstanding unvested/unexercised grants; and
 - SVT based only on new shares requested plus shares remaining for future grants.
- **Plan Features:**
 - Absence of problematic change-in-control (CIC) provisions, including:
 - Single-trigger acceleration of award vesting in connection with a CIC; and
 - Settlement of performance-based equity at target or above in the event of a CIC-related acceleration of vesting regardless of performance.
 - No financial assistance to plan participants for the exercise or settlement of awards;
 - Public disclosure of the full text of the plan document; and
 - Reasonable share dilution from equity plans relative to market best practices.
- **Grant Practices:**
 - Reasonable three-year average burn rate relative to market best practices;
 - Meaningful time vesting requirements for the CEO’s most recent equity grants (three-year lookback);
 - The issuance of performance-based equity to the CEO;
 - A clawback provision applicable to equity awards; and
 - Post-exercise or post-settlement share-holding requirements (S&P/TSX Composite Index only).

Generally vote against the plan proposal if the combination of above factors, as determined by an overall score, indicates that the plan is not in shareholders’ interests. In addition, vote against the plan if any of the following unacceptable factors have been identified:

- Discretionary or insufficiently limited non-employee director participation;
- An amendment provision that fails to adequately restrict the company’s ability to amend the plan without shareholder approval;
- A history of repricing stock options without shareholder approval (three-year look-back);
- The plan is a vehicle for problematic pay practices or a significant pay-for-performance disconnect under certain circumstances; or
- Any other plan features that are determined to have a significant negative impact on shareholder interests.

¹⁷ In cases where certain historic grant data are unavailable (e.g. following an IPO or emergence from bankruptcy), Special Cases models will be applied that omit factors requiring these data.

Director Compensation – TSX

Sustainability Policy Recommendation: On a case-by-case basis, generally vote withhold for members of the committee responsible for director compensation (or, where no such committee has been identified, the board chair or full board) where director compensation practices that pose a risk of compromising a non-employee director's independence or that otherwise appear problematic from the perspective of shareholders have been identified, including:

- Excessive (relative to standard market practice) inducement grants issued upon the appointment or election of a new director to the board (consideration will be given to the form in which the compensation has been issued and the board's rationale for the inducement grant);
- Performance-based equity grants to non-employee directors that could pose a risk of aligning directors' interests away from those of shareholders and toward those of management; and
- Other significant problematic practices relating to director compensation.

Other Compensation Plans

Employee Stock Purchase Plans (ESPPs, ESOPs)

Sustainability Policy Recommendation: Generally vote for broadly based (preferably all employees of the company with the exclusion of individuals with 5% or more beneficial ownership of the company) employee stock purchase plans where the following apply:

- Reasonable limit on employee contribution (may be expressed as a fixed dollar amount or as a percentage of base salary excluding bonus, commissions and special compensation);
- Employer contribution of up to 25% of employee contribution and no purchase price discount or employer contribution of more than 25% of employee contribution and SVT cost of the company's equity plans is within the allowable cap for the company;
- Purchase price is at least 80% of fair market value with no employer contribution;
- Potential dilution together with all other equity-based plans is 10% of outstanding common shares or less; and
- The Plan Amendment Provision requires shareholder approval for amendments to:
 - The number of shares reserved for the plan;
 - The allowable purchase price discount;
 - The employer matching contribution amount.

Treasury funded ESPPs, as well as market purchase funded ESPPs requesting shareholder approval, will be considered to be incentive based compensation if the employer match is greater than 25% of the employee contribution. In this case, the plan will be run through the Sustainability compensation model to assess the Shareholder Value Transfer (SVT) cost of the plan together with the company's other equity-based compensation plans.

Eligibility and administration are also key factors in determining the acceptability of an ESPP/ESOP plan.

The Sustainability Policy will also take into account other compensation and benefit programs, in particular pensions.

Deferred Share Unit Plans

Sustainability Policy Recommendation: Generally vote for Deferred Compensation Plans if:

- Potential dilution together with all other equity-based compensation is 10% of the outstanding common shares or less.

Other elements of director compensation to evaluate in conjunction with deferred share units include:

- Director stock ownership guidelines of a minimum of three times annual cash retainer;
- Vesting schedule or mandatory deferral period requiring that shares in payment of deferred units may not be paid out until the end of three years;
- The mix of remuneration between cash and equity; and
- Other forms of equity-based compensation, i.e. stock options, restricted stock.

International Guidelines

Sustainability Policy Recommendation: Evaluate executive and director compensation proposals on a case-by-case basis taking into consideration the Global Principles as applicable.

5. Environmental & Social

Social and Environmental Proposals – Overall Approach

ISS' Sustainability Policy generally supports standards-based ESG shareholder proposals that enhance long-term shareholder and stakeholder value while aligning the interests of the company with those of society at large. In particular, the policy will focus on resolutions seeking greater transparency and/or adherence to internationally recognized standards and principles.

Sustainability Policy Recommendation: Generally vote in favor of social and environmental proposals that seek to promote good corporate citizenship while enhancing long-term shareholder and stakeholder value. In determining votes on shareholder social and environmental proposals, the following factors are considered:

- Whether the proposal itself is well framed and reasonable;
- Whether adoption of the proposal would have either a positive or negative impact on the company's short-term or long-term share value;
- The percentage of sales, assets and earnings affected;
- Whether the company has already responded in some appropriate manner to the request embodied in a proposal;
- Whether the company's analysis and voting recommendation to shareholders is persuasive;
- What other companies have done in response to the issue;
- Whether there are significant controversies, fines, penalties, or litigation associated with the company's environmental or social practices;
- Whether implementation of the proposal would achieve the objectives sought in the proposal.

Climate Change

Sustainability Policy Recommendation:

- Vote for shareholder proposals seeking information on the financial, physical, or regulatory risks it faces related to climate change- on its operations and investments, or on how the company identifies, measures, and manage such risks.
- Vote for shareholder proposals calling for the reduction of GHG emissions.
- Vote for shareholder proposals seeking reports on responses to regulatory and public pressures surrounding climate change, and for disclosure of research that aided in setting company policies around climate change.
- Vote for shareholder proposals requesting a report/disclosure of goals on GHG emissions from company operations and/or products.
- Vote case-by-case on shareholder proposals that request the company to its upcoming/ approved climate transition action plan and provide shareholders the opportunity to express approval or disapproval of its GHG emissions reduction plan. Factors such as the completeness and rigor of the company's climate-related disclosure, the company's actual GHG emissions performance, whether the company has been the subject of recent, significant violations, fines, litigation, or controversy related to its GHG emissions, and whether the proposal's request is unduly burdensome (scope or timeframe) or overly prescriptive will be taken into account.

Say on Climate (SoC) Management Proposals

Sustainability Policy Recommendation: Vote case-by-case on management proposals that request shareholders to approve the company's climate transition action plan¹¹, taking into account the completeness and rigor of the plan. Information that will be considered where available includes the following:

- The extent to which the company's climate related disclosures are in line with TCFD recommendations and meet other market standards;
- Disclosure of its operational and supply chain GHG emissions (Scopes 1, 2, and 3);
- The completeness and rigor of company's short-, medium-, and long-term targets for reducing operational and supply chain GHG emissions in line with Paris Agreement goals (Scopes 1, 2, and 3 if relevant);
- Whether the company has sought and approved third-party approval that its targets are science-based;
- Whether the company has made a commitment to be "net zero" for operational and supply chain emissions (Scopes 1, 2, and 3) by 2050;
- Whether the company discloses a commitment to report on the implementation of its plan in subsequent years;
- Whether the company's climate data has received third-party assurance;
- Disclosure of how the company's lobbying activities and its capital expenditures align with company strategy;
- Whether there are specific industry decarbonization challenges; and
- The company's related commitment, disclosure, and performance compared to its industry peers.

6. Other Items

Reorganizations/Restructurings

Sustainability Policy Recommendation: Vote reorganizations and restructurings on a case-by-case basis.

Mergers and Acquisitions

Sustainability Policy Recommendation: Vote case-by-case on mergers and acquisitions taking into account the following:

For every M&A analysis, the Sustainability Policy reviews publicly available information as of the date of the report and evaluates the merits and drawbacks of the proposed transaction, balancing various and sometimes countervailing factors including:

- **Valuation** – Is the value to be received by the target shareholders (or paid by the acquirer) reasonable? While the fairness opinion may provide an initial starting point for assessing valuation reasonableness, Sustainability places emphasis on the offer premium, market reaction, and strategic rationale;
- **Market reaction** – How has the market responded to the proposed deal? A negative market reaction will cause Sustainability to scrutinize a deal more closely;
- **Strategic rationale** – Does the deal make sense strategically? From where is the value derived? Cost and revenue synergies should not be overly aggressive or optimistic, but reasonably achievable. Management should also have a favorable track record of successful integration of historical acquisitions;
- **Conflicts of interest** – Are insiders benefiting from the transaction disproportionately and inappropriately as compared to non-insider shareholders? Sustainability will consider whether any special interests may have influenced these directors and officers to support or recommend the merger;
- **Governance** – Will the combined company have a better or worse governance profile than the current governance profiles of the respective parties to the transaction? If the governance profile is to change for the worse, the burden is on the company to prove that other issues (such as valuation) outweigh any deterioration in governance.
- **Stakeholder impact** – Impact on community stakeholders including impact on workforce, environment, etc.

Vote against if the companies do not provide sufficient information upon request to make an informed voting decision.

Mandatory Takeover Bid Waivers

Sustainability Policy Recommendation: Vote proposals to waive mandatory takeover bid requirements on a case-by-case basis.

Reincorporation Proposals

Sustainability Policy Recommendation: Vote reincorporation proposals on a case-by-case basis.

Expansion of Business Activities

Sustainability Policy Recommendation: Vote for resolutions to expand business activities unless the new business takes the company into risky areas.

Related-Party Transactions

Sustainability Policy Recommendation: Vote related-party transactions on a case-by-case basis considering factors including, but not limited to, the following:

- The parties on either side of the transaction;
- The nature of the asset to be transferred/service to be provided;
- The pricing of the transaction (and any associated professional valuation);
- The views of independent directors (where provided);
- The views of an independent financial adviser (where appointed);
- Whether any entities party to the transaction (including advisers) are conflicted; and
- The stated rationale for the transaction, including discussions of timing.

If there is a transaction that is deemed problematic and that was not put to a shareholder vote, Sustainability may recommend against the election of the director(s) involved in the related-party transaction or against the full board.

Antitakeover Mechanisms

Sustainability Policy Recommendation: Vote against all antitakeover proposals unless they are structured in such a way that they give shareholders the ultimate decision on any proposal or offer.

As of 1 February 2016, for French companies listed on a regulated market, generally vote against any general authorities impacting the share capital (i.e. authorities for share repurchase plans and any general share issuances with or without preemptive rights, including by capitalization of reserves) if they can be used for antitakeover purposes without shareholders' prior explicit approval.

Social and Environmental Proposals – Overall Approach

ISS' Sustainability Policy generally supports standards-based ESG shareholder proposals that enhance long-term shareholder and stakeholder value while aligning the interests of the company with those of society at large. In particular, the policy will focus on resolutions seeking greater transparency and/or adherence to internationally recognized standards and principles.

Sustainability Policy Recommendation: Generally vote in favor of social and environmental proposals that seek to promote good corporate citizenship while enhancing long-term shareholder and stakeholder value. In determining votes on shareholder social and environmental proposals, the following factors are considered:

- Whether the proposal itself is well framed and reasonable;
- Whether adoption of the proposal would have either a positive or negative impact on the company's short-term or long-term share value;
- The percentage of sales, assets and earnings affected;
- Whether the company has already responded in some appropriate manner to the request embodied in a proposal;
- Whether the company's analysis and voting recommendation to shareholders is persuasive;
- What other companies have done in response to the issue;
- Whether there are significant controversies, fines, penalties, or litigation associated with the company's environmental or social practices;
- Whether implementation of the proposal would achieve the objectives sought in the proposal.

7. Foreign Private Issuers

Foreign private issuers (“FPIs”) are defined as companies whose business is administered principally outside the US, with more than 50% of assets located outside the US; a majority of whose directors/officers are not

US citizens or residents; and a majority of whose outstanding voting shares are held by non-residents of the US Companies that are incorporated outside of the US and listed solely on US exchanges, where they qualify as FPIs, will be subject to the following policy:

Vote against or withhold from non-independent director nominees at companies that fail to meet the following criteria – a majority-independent board, and the presence of an audit, compensation, and a nomination committee, each of which is entirely composed of independent directors. Where the design and disclosure levels of equity compensation plans are comparable to those seen at US companies, US compensation policy will be used to evaluate the compensation plan proposals. All other voting items will be evaluated using the relevant regional or market proxy voting guidelines.

While a firm’s country of incorporation will remain the primary basis for evaluating companies, Sustainability Advisory Services will generally apply its US policies to the extent possible with respect to issuers that file DEF 14As, 10-K annual reports, and 10-Q quarterly reports, and are thus considered domestic issuers by the US Securities and Exchange Commission (SEC). US policies will also apply to companies listed on US exchanges as Foreign Private Issuers (FPIs) and that may be exempt from the disclosure and corporate governance requirements that apply to most companies traded on US exchanges, including a number of SEC rules and stock market listing requirements. Corporations that have reincorporated outside the US have found themselves subject to a combination of governance regulations and best practice standards that may not be entirely compatible with an evaluation framework based solely on the country of incorporation.

Founded in 1985, the Institutional Shareholder Services group of companies (“ISS”) is the world’s leading provider of corporate governance and responsible investment solutions alongside fund intelligence and services, events, and editorial content for institutional investors, globally. ISS’ solutions include objective governance research and recommendations; responsible investment data, analytics, and research; end-to-end proxy voting and distribution solutions; turnkey securities class-action claims management (provided by Securities Class Action Services, LLC); reliable global governance data and modeling tools; asset management intelligence, portfolio execution and monitoring, fund services, and media. Clients rely on ISS’ expertise to help them make informed investment decisions.
